Banner Power Booster PB12

Maximized power and proved technology with improved and additional functions

Increased-power rated PB12 Jump Starter in Banner Design with high performance AGM battery for all common vehicles. 12 V DC outlet provides DC power for external battery charging. 2.1 A USB output is ideal for charging smartphones and tablets. Rugged body housing for professional task. Easy and safe to use, including reverse battery protection with audible warning. Market exclusivity in Europe. Equipped with LED flashlight for simple working in dark environment.

CHARACTERISTICS

Construction: heavy duty housing

Testing Function: battery voltage test, shows charging of the internal battery (V and %)

Protection: on/off switch to eliminate shorting of clamps and battery drain, reverse battery protection with audible warning, ventilated case and integrated exhaust system ensure potential escape of battery gases

Clamps: replaceable, heavy-duty ultra-flexible cables and fully insulated curved clamps with innovative LED light on the tip of negative clamp

Display: big LCD-Display

Battery: 23 Ah high-performance AGM battery, replaceable, Banner design

Charging: automatic charger or direct-charging over 12 V DC car cigarette lighter interface

Accessories: supplied with intelligent, automatic and micro-processor controlled 2-amp charger for charging internal battery, 2.1 A USB output ideal for charging smartphones and tablets

APPLICATION

Professional Range

12 V: **STD** **Ca** **AGM** **EFB** **Start Stop** **GEL**

TECHNICAL DATA

Type:	PB 12 Jump Starter
Nominal Voltage:	12 V – 2 A
Cranking Current:	900 A
Peak Current:	2.300 A
Battery Capacity:	23 Ah AGM
Charger:	230 V AC / 12 V DC, 2 A
Dimension:	340 x 410 x 140 mm
Weight:	11.0 kg
Power Cable:	144 cm (AWG 4 = 21 mm ²)
